DETAILED ACTION

Receipt is acknowledged of the Remarks filed 24 November 2003 and the Notice of Appeal filed 27 February 2004.

Response to Arguments

Applicant argues on page 2, lines 9+ that the rejection dated 21 August 2003 was improperly made final. The Examiner agrees and regrets any inconvenience.

Therefore, the Office Action dated 21 August 2003 will be treated as a Non-Final Rejection.

Applicant's arguments see page 4, lines 3+, filed 21 August 2003, with respect to claims 1-18 and 19-25 have been fully considered and are persuasive. The 102 and 103 rejections of claims 1-18 and 19-25 have been withdrawn. However, the Double Patenting Rejection with respect to claims 1-17 and 19-25 has been maintained.

Claims 1 and 19 are objected to because of the following informalities:

- Claim 1, line 2: "a beam of radiation"; should be --a beam of penetrating radiation--.
- Claim 19, line 2: "beam of radiation"; should be --a beam of penetrating radiation--.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-17 and 19-25 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24 of copending Application No. 09/797,498. Although the conflicting claims are not identical, they are not patentably distinct from each other because one skilled in the art would recognize that a Fabry-Perot analyzer receives a first and second portion of a beam of radiation and suppresses the intensity of the first portion of the beam and transmits the second portion of the beam. Therefore, a Fabry-Perot analyzer anticipates the analyzer as claimed in claim 1. Accordingly, it would have been obvious to one of ordinary skill in the art to claim the Fabry-Perot analyzer more broadly as just an analyzer.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

Should the above Double Patenting rejection be overcome by the filing of a Terminal Disclaimer, Claims 1-25 would be allowable over the prior art.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record discloses an imaging system comprising an analyzer that receives a first and second portion of a beam of penetrating radiation and transmits the first portion of the beam to a detector and filters out the second portion of the beam, wherein the second portion of the beam does not impinge the detector. However, the prior art fails to teach or fairly suggest an imaging system comprising an analyzer that receives a first and second portion of a beam of penetrating radiation, suppresses the intensity of the first portion of the beam of radiation and transmits the second portion of the beam, wherein both the first portion of the beam having a suppressed intensity and the second portion of the beam impinge the detector in order to generate an image as claimed in claims 1 and 19. Claims 1-18 and 20-25 would be allowable by virtue of their dependency.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
